

MOTORIZED STRAIGHTENING GROUP

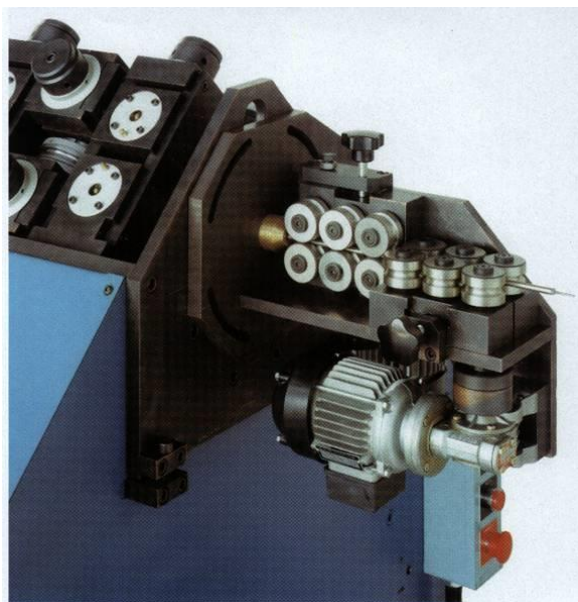

The difficulty of achieving a straight heating element at the exit of the roll reducing mill is well known.

We have designed this device to reduce this problem and to achieve a "straighter" heating element at the exit of the roll reducing mill.

It is a unit which can be mounted on any reducing mill. It is formed by 3 + 3 pairs of rolls, specially shaped and placed on 2 work planes.

AVAILABLE VERSIONS

ELEMENT DIAMETER 6-8,5 MM

Mod. 143/00.200000

Straightener for diameter 6-8,5 mm

ELEMENT DIAMETER UP TO 14 MM

Mod. 143/00.230000

Straightener for diameter up to 14 mm

OPTIONS

Mod. 143/00.000200

Set of rolls
